*(MLA 7th ed.) How do I cite an e-book on a device like a Kindle, Nook, or iPad?*

---

## **(MLA 7th ed.) How do I cite an e-book on a device like a Kindle, Nook, or iPad?**

MLA 5.7.18 defines digital files as neither on the web or a published CD-ROM. Digital files include a PDF on your computer, a word processed document created by a peer, a scanned image you received via e-mail, or "a sound recording formatted for playing on a digital audio player."

MLA recommends citing a book on a digital device using the guidelines for citing a book but replacing the format type (Print) with the name of the digital file format, followed by the word "file." For the "Digital file type" field on the form, enter a file format such as "PDF file", "EPUB file" (a non-proprietary file format used by Kobo, Nook, Sony and others) or "Plain text file." If an e-Book reader uses a proprietary format (e.g., Kindle), you may use the name of the file type ("AZW file") or, if this is not visible to you, the name of the device ("Kindle file").

Procedure: To cite an e-book on a digital device, select "Book" as the citation type, then choose:

"Digital File: A file independent from the Web or a published disc (e.g., a PDF or Word file on your computer)" as the publication medium.

If page numbers do not remain constant when you enlarge the text or if page numbers are device-specific, answer "No" to "Does the source have page numbers?"

Example:

Slawenski, Kenneth. J.D. Salinger: A Life. New York: Random, 2011. N. pag. EPUB file.

Parenthetical Reference:

Do not use location numbers in the parenthetical reference as they vary when the e-book is on different devices and may change when you enlarge the text. N. page will appear in your citation (MLA 5.7.18). To create a parenthetical reference for a source with inconsistent pagination, follow our advice in Rule 5 for in-text references. You may be able to use chapter, section, and paragraph numbers, chapter titles and subtitles, or acts and scenes in-text. E-book readers are beginning to employ consistent pagination. For example, some Kindle books will include page numbers that match the print edition. They are displayed next to locations when you push the Menu button.
